FOR IMMEDIATE RELEASE

MXL® Introduces Affordable USB Desktop Recording Kit

The Studio 1 USB Desktop Recording kit provides warm, studio-quality sound for vocal and instrument recording, podcasting, voiceovers and more.

El Segundo, CA, January 15, 2009 – MXL® Technology a division of Marshall Electronics, adds the Studio 1 Desktop Recording Kit to their critically acclaimed line of USB microphones. Using the best of both analog and digital technologies, the MXL Studio 1 includes a portable USB condenser that can be used for virtually any recording task, from podcasting to instruments and vocal recordings.

The Studio 1 USB Desktop Recording Kit is completely plug and play for both PC and Mac. Users simply plug the mic into a laptop or desktop computer through a standard USB port with no mixers, preamps or other expensive studio gear required.

Features of the Studio 1 not found on similarly-priced units include a built-in headphone jack for low latency monitoring and clear audio playback. The low latency feature provides more accurate recording when doing voiceovers and internet recordings such as podcasts. The MXL Studio 1 USB microphone also include a 2-micron diaphragm capsule, 16-bit audio resolution, 44.1 kHz and 48 kHz sampling rate, and 40 Hz to 20 kHz frequency response.

The MXL Studio 1 includes a hard plastic carrying case, desktop microphone stand/adaptor, 10-foot USB cable, user manual, and application guide to get the most from your recordings.
