MXL UNVEILS ITS V67 RECORDING KIT, A MATCHED SET OF WORLD CLASS MICROPHONES IN A ROAD READY CASE

*MXL Introduces A Microphone Kit With A Selection of Microphones Designed To Meet The Demands of
Most Studio Recording Applications*

El Segundo, CA, March 21, 2012 –MXL Microphones, a leading manufacturer of professional recording microphones today announced the upcoming release of the V67 Recording Kit. The V67 Recording Kit contains a matched setup of several MXL microphones, mounts and adaptors that are designed and geared towards specific recording applications which include all vocals and instruments such as piano, guitar, choirs, and string sessions. In addition, all of the microphones are kept safe in a self-contained and durable protective case.

The V67 Recording Kit includes the V67GS microphone as well as two V67N microphones. It also includes mounts, adaptors and a travel case. The V67GS is a large-diaphragm cardioid condenser microphone that combines Class-A FET circuitry and a transformer /coupled output for an open and pure sound. The V67GS also offers a smooth rising presence peak which is preferred for vocals when there is a heavy low end in the mix.

The V67N is a pressure-gradient condenser microphone with cardioid/omni pattern, and a signature marked by the right blend of power, presence and clarity. Hand-selected components and transformer-balanced output help deliver a solid bottom end and exposed top, making it good choice for overhead recording of piano, guitar, drums, choirs, and other applications.

"We are excited to be offering this complete vocal and instrument microphone recording kit. MXL mics have been relied on by top professionals for instrument and vocal recording for many years," states Perry Goldstein, MXL Sales & Marketing Manager. "Now, we offer what we consider the perfect combination of mics. The V67 kit is a set that sounds great, is priced right, and offers all recording enthusiasts the opportunity to add our V67 products to their professional and project studio."

Key Features:

- Contains one V67GS with 6-micron, gold sputtered diaphragm, high-pass roll-off switch, -6dB pad, and frequency response of 30Hz to 20kHz.
- Contains two V67N's 6-micron, gold sputtered diaphragm and frequency response of 20Hz to 20kHz.
- V67N microphones are internally wired with Mogami cable for added sonic integrity.
- Includes mounts, adapters and a case

The V67 Recording Kit will be available in music stores starting May 2012.
