## **MXL Announces New 770X Multipattern Condenser Microphone Package, Optimized for Recording Vocals and Instruments**

*The new **MXL 770X** Multipattern Condenser Microphone Package offers an all-in-one recording bundle, complete with balanced XLR cable and shockmount with integrated popfilter.*

**ANAHEIM, CA – MXL Microphones announces the new MXL 770X** Multipattern Condenser Microphone Package, offering flexibility and performance for the studio in an all-in-one recording bundle.

The 770X improves on the widely used MXL 770 studio condenser microphone, favored by recording artists around the world for producing warmth and clarity with a balanced mid-range for professional recordings. The 770X further expands on the success of the 770 with an upgraded large diaphragm gold-sputtered capsule in three switch-selectable polar patterns: cardioid, figure-eight and omni-directional, optimized for recording vocals and a wide variety of instruments.

The new MXL **770X** will be on display at the upcoming NAMM Show in Anaheim, California, Hall A, Booth #6700. For more information, visit [www.mxlmics.com](http://www.mxlmics.com) or contact sales@mxlmics.com.

###
