MXL Breaks the Rules With Innovative New DX-2 Variable Dynamic Instrument Microphone

*The new **MXL DX-2**® Variable Dynamic Instrument Microphone allows limitless customization of tone and pickup with innovative design for optimal microphone performance and placement.*

ANAHEIM, CA – MXL Microphones announces the new **MXL DX-2**® Dual Capsule Variable Dynamic Instrument Microphone, featuring unique flat-faced design and signature variable control knob for blending tone between with two distinctly different capsules.

The **MXL DX-2**® is the first dual capsule dynamic microphone that allows you to tailor the sound from one capsule to the other and all points in between, so that you can easily customize your sound. The front of the microphone is a flat-faced, side-address design which places the microphone capsules close to the sound for optimal pickup, while the opposite side has the crossfade knob, making adjustments a breeze. Capsule 1's super cardioid large capsule design captures the warmth and fullness of your instrument while Capsule 2's cardioid small capsule offers superb mid range and high end detail.

“The DX-2 is the first mic of it's kind that allows the performer or engineer to sweep through two distinctly different dynamic cartridges with distinctly different tones in real time”,

states Scott Krueckeberg, Designer and MXL Division Manager, “recording or playing live, set it to your preferred blend or adjust it on the fly, without any noise or significant phase cancellation”.

The MXL **DX-2**®'s flat-face design also allows for optimal placement directly on guitar cabinets with a higher SPL tolerance for horns and drums. Sturdy all-metal body construction for enhanced durability to withstand extended on-stage use and internal MOGAMI® wiring for unmatched clarity. This unique body style represents a step forward for MXL microphone designs and will sets the standard for future MXL innovation.

The MXL **DX-2**® will be on display at the NAMM Show in Anaheim, California, Hall A, Booth #6700. For more information, visit www.mxlmics.com or contact sales@mxlmics.com.
